Message from the Guest Editors

Nowadays, pharmaceutical development faces a large host of issues deriving from the particularities of each pharmacological active principle, from botanicals to biologics and biosimilars. In many cases, these molecules or the already formulated drugs create controversies regarding the bioavailability, interactions, novel potential mechanisms of action with consequences on their efficacy and risks.

Therefore, in this Special Issue titled "Pharmaceutical Development and Bioavailability Analysis", we encourage researchers to present the most recent studies regarding various developments in the pharmaceutical field, with a strong focus on the drugs' bioavailability and potential effects on the formulation, delivery systems, pharmacokinetics, interactions, and preclinical and clinical significance. The manuscripts may include research articles and reviews in order to advance the pharmaceutical development.

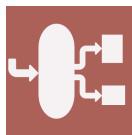

Deadline for manuscript submissions:

closed (31 December 2022)

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
