Message from the Guest Editor

Recently, the food industry has become interested in byproducts derived from plants and fruits due to their rich content of polyphenols and their potential use for functional foods or food supplements. Many efforts have been made to achieve efficient extraction and highly sensitive detection of phenolic compounds.

The topics of this Special Issue, titled "*Trends in Extraction and Detection of Phenolic Compounds and Their Application*", include, but are not limited to, the following:

- Different methods of extraction and detection of phenolic compounds
- Phenolic compounds' potential uses and applications
- Investigation and comparison of phenolic profiles and antioxidant activities measured by different methods;
- Analysis of the correlations among individual and total phenolic contents and antioxidant activity;
- Quantification of the contribution of individual phenolic compounds to antioxidant activity.

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
