### Message from the Guest Editors

This Special Issue on "**Recent Advances in Processed Materials for Energy Applications**" aims to inventory the latest achievements in the development and manufacture of contemporary materials used in energy applications. This Special Issue welcomes papers concerning the fabrication, synthesis and design of materials and related technologies, including atomic layer deposition (ALD), composite nanostructured carbon-based materials, semiconductors, photovoltaics, conductive polymers and research on their structural properties, including the testing and characterization of novel materials or the introduction of different types of hybrid materials for future energy technologies.

Deadline for manuscript  
submissions:

**closed (31 January 2022)**

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
