## **Message from the Guest Editors**

The recent interest in environmental engineering problems has led to the development of techniques and technologies to reduce atmospheric pollution; improve water management and treatment; and rationalize waste treatment, disposal, and management.

This Special Issue, "Renewable Energy in Environmental Engineering", aims to gather contributions that deal with advances in environmentally clean technologies, renewable energy, and sustainable development. Topics include, but are not limited to, the following:

- Sustainable development;
- Environmental protection;
- Atmospheric pollution;
- Environmental impact;
- Renewable energy;
- Water management;
- Waste management;
- Solar technologies.

## **Message from the Editor-in-Chief**

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus,

SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous*))
