Message from the Guest Editors

This Special Issue aims to focus on recent progresses and advances in vectors design, secretion signals, recombinant protein purifications, oligomeric protein expression, virus-like particle production and subunit vaccines production.

Topics include, but are not limited to:

- vector designs for protein expression system;
- investigations on signal peptide for recombinant proteins production;
- downstream process of recombinant proteins;
- development of oligomeric recombinant expression vectors;
- virus like particle production and preparations;
- subunit vaccines production and preparations.

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus,
SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.
Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
