Message from the Guest Editors

Photocatalysis has emerged as a highly potential process offering simple, green, and practical solutions to tackle environmental pollution and develop renewable energy supplies. Specifically, by using photocatalyst materials and light as input energy sources, this process can produce renewable fuels and energy carriers or initiate the decomposition/mineralization of pollutants without releasing by-products. Developing efficient photocatalysts is an essential step to achieve effective photocatalysis.

This Special Issue aims to bring readers the latest advances in research on developing high-efficiency materials for different photocatalytic applications (e.g., H₂ production, CO₂ reduction, and pollutant degradation, etc.) with a particular focus on new materials, novel synthesis and/or engineering strategies, and the mechanism study of photocatalytic activity. We are pleased to invite researchers from all over the world who are strongly interested in these aspects to submit their original research and review papers. We believe that the expected contributions to this Special Issue will make it one of the prime sources for applied material-related research.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
