Institute, Plac Gwarków 1, 40-166  
Katowice, Poland

Deadline for manuscript  
submissions:

**closed (30 November 2020)**

### Message from the Guest Editors

This Special Issue is devoted to thermochemical conversion of various fuels (hard coal, lignite, biowaste, and waste) into power, heat, and valuable chemical products. While coal combustion and gasification are mature technologies, the application of other materials in these processes, including biomass and waste, is still subject to intensive research and development activities all over the world. Within the thematic area covered by this Special Issue, the thermochemical methods of waste biomass utilization are also considered, e.g., the technologies of thermal processing of waste water sludge, with particular attention given to the existing and future installations. The studies concerning the advancements in hydrogen-rich gas production in a gasification route the environmental aspects associated with this process, as well as the issues related to the potential recovery of valuable by-products, are also welcome.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Giancarlo Cravotto

Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** CiteScore - Q2 (Chemical Engineering (miscellaneous))
