Message from the Guest Editors

With the efforts of researchers, methods covering high efficiency of digestion as well as selective extraction using modified solid-phase extraction protocols or liquid–liquid micro-extraction methods have appeared. According to the different analytes and materials (environmental, biological, and food samples, for example), the selection of methods can change, embracing instruments for spectroscopy, chromatography, mass spectrometry, electrochemical sensors, etc. The purpose of this Special Issue is to collect articles on topics related to chemical sample pretreatment processes for analysis with spectroanalytical techniques, either as articles or reviews.

Topics include but are not limited to those listed above.

an Open Access Journal by MDPI

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
