Deadline for manuscript submissions:

31 January 2025

Message from the Guest Editors

Dear Colleagues,

Natural products from plant extracts and essential oils constitute an effective alternative for managing agricultural pests and diseases since they have a variety of biological activities, such as insecticides, antifeedants, deterrents, antimicrobials, etc.

Many natural compounds are used to manage pests and diseases, such as alkaloids, terpenoids, flavonoids, phenylpropanoids, and glycosides, among others, which can be different extraction processes.

This Special Issue aims to increase knowledge about natural extracts' composition and extraction process, their identification methods, their mechanism of action, and their activity against agricultural pests and diseases.

Keywords

- natural products
- entomology insecticide activity
- bioactive compounds
- molecular diagnostic
- pathogenic microorganism in insect

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
