### Message from the Guest Editors

Dear Colleagues,

This Special Issue provides information about the synthesis and environmental/biomedical applications of micro/nanomagnetic materials (i.e., paramagnetic, diamagnetic, and ferromagnetic). Environmental applications of magnetic materials/nanomaterials include the synthesis and design of new magnetic materials and their applications to develop new techniques, technologies, and solutions for pollution remediation (soil, water, and air pollution), water purification, environmental sensing, cost-effective alternative energy generation, resources, plant nutrition, agricultural applications, and nanosensor, nanoabsorbent and nano-photocatalyst applications. Moreover, magnetic materials are indispensable and promising for many biomedical applications, including but not limited to hyperthermia, controlled drug delivery and release, tissue engineering, therapeutics, laboratory-on-chip applications, and imaging technology. In addition, the possible toxic effects of these applications for living beings, difficulties in clinical applications, and recent developments are within the scope of this Special Issue.

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
