Deadline for manuscript  
submissions:

**closed (10 April 2022)**

### **Message from the Guest Editor**

The production of alcoholic beverages by yeasts is one of the oldest biotechnological processes, and it has high economic importance. Yeasts are the main actors of this process; therefore, the selection of suitable yeast strains is essential for an efficient fermentation and especially for the final wine sensory quality.

This Special Issue invites specialists and researchers to contribute with original and review articles concerning the following or related topics:

- Occurrence and enological properties of nonconventional yeasts
- Microbial biodiversity and ecology
- Effect of yeasts on wine volatile profile and/or sensory profile
- New useful methods for the detection of yeast or some metabolites produced during vinification;
- Yeast interaction with matrices and their impact on aromatic precursors, color or related aspects;
- Wine fault due to yeast development in wine
- Organic/biodynamic wines: an emerging reality

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Giancarlo Cravotto

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
