Message from the Guest Editors

The recycling of bioactive compounds from agro-food waste and their transformation into novel added-products appears to be an efficient approach to promoting a sustainability and circular economy. Over the last few years, the scientific community has been developing the valorization of polyphenols extracted from food by-products through lipophilization processes towards novel applications for food, cosmetic, and pharmaceutical industries. This Special Issue is focused on the recent developments of the polyphenols lipophilization processes, taking in account green chemistry approaches, including alternative solvents such ionic liquids and deep eutectic mixtures, microwave-assisted synthesis, new biocatalysts, eco-friendly chemical reactions, and new covalent functionalizations.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
