Message from the Guest Editors

Dear Colleagues,

Biochar, a biomass-derived carbon material, has been demonstrated to be a possible material to promote sustainability in different fields from composite production where biochar is used as eco-friendly alternative to oil-derived carbon materials, to the use of biochar in all the fields where other carbon materials are used.

This Special Issue aims to:

1. Explore all the new possible applications in the field of biochar. In particular, papers where biochar is the key factor for innovative applications that promote sustainability will be accepted.
2. Provide an up-to-date picture of recent advances and outstanding innovations in the field of biochar applications. Studies in different fields where biochar is the main actor will be welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
