Message from the Guest Editors

This Special Issue entitled “Biogas Production Processes from Biomass” aims to present innovative achievements in the development and use of methane fermentation for the treatment of biowaste. Topics include, but are not limited to:

- Development of new fermentation media using waste biomass and optimization of biogas yield;
- Diagnosis of the impact of using biodegradable waste for methane fermentation considering social, ecological, and economic aspects;
- Utilization of digestate for energy and fertilizing purposes;
- Development of models specific for biogas production in co-fermentation of agricultural biomass with biowaste.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
