### Message from the Guest Editor

Dear Colleagues,

Sustainable development, and in particular rational waste management, constitutes a major challenge to contemporary industries. An efficient way of recycling waste biomass is to use it as a substrate in biological processes. A sustainable solution should also be consistent with the green chemistry concept, according to which processes should be designed and conducted to minimize hazards to the natural environment. Green chemistry implies the application of alternative ways of synthesizing chemical compounds and the optimization of process conditions so as to increase selectivity and decrease waste. This Special Issue focuses on recent developments in biomass (especially waste biomass: wood or forest residues, waste from food crops, horticulture, food processing, animal farming, or human waste from sewage plant) biological conversion, and valorization. Safely reusing waste/biomass should lead to its transformation into valuable compounds and materials; energy and fuels or platform chemicals.

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
