Message from the Guest Editors

This Special Issue on "Catalysis in Membrane Reactors" is being coordinated with the 14th International Conference on Catalysis in Membrane Reactors (ICCMR-14) which is being held from 8–11 July, 2019 in Eindhoven, The Netherlands. The aim of the ICCMR conference is to promote the research and progress in the area of catalytic membrane systems by bringing together academic scientists and industry working in the membrane, catalysis and process engineering fields.

This Special Issue collects works related to membrane reactors and processes related to membranes and membrane reactors. It will also include selected papers from ICCMR-14 conference

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
