Process System Engineering for More Efficient Power and Chemicals Production

Collection Editors:

Prof. Dr. Fausto Gallucci

Inorganic Membranes and Membrane Reactors, Sustainable Process Engineering, Department of Chemical Engineering and Chemistry, Eindhoven University of Technology, 5612 AZ Eindhoven, The Netherlands

Dr. Vincenzo Spallina

Department of Chemical Engineering and Analytical Science, The University of Manchester, Oxford Road, Manchester M13 9PL, UK

Message from the Collection Editors

Process System Engineering (PSE) is a very powerful tool for the optimization of chemical plants. The need for more efficient processes, especially in energy intensive industries, is driving the research towards more efficient and often compact process designs. The Special Issue, "Process System Engineering for more Efficient Power and Chemical Production" of *Processes* seeks contributions to assess the state-of-the-art and future developments in the exiting area of process design. Topics include, but are not limited to, process system integration, process intensification, computational driven process synthesis, plant optimization, advanced separations, control and safety systems.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
