### Message from the Collection Editors

Process System Engineering (PSE) is a very powerful tool for the optimization of chemical plants. The need for more efficient processes, especially in energy intensive industries, is driving the research towards more efficient and often compact process designs. The Special Issue, "Process System Engineering for more Efficient Power and Chemical Production" of *Processes* seeks contributions to assess the state-of-the-art and future developments in the exiting area of process design. Topics include, but are not limited to, process system integration, process intensification, computational driven process synthesis, plant optimization, advanced separations, control and safety systems.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Giancarlo Cravotto

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
