### Message from the Guest Editor

In this Special Issue, we welcome both research and review manuscripts targeted towards disease modeling using engineering and stem cell approaches including , but not limited to, in vitro models of diseases of the heart, lung, intestine, liver, kidney, cartilage, skin, and vascular, endocrine, musculoskeletal, and nervous systems, as well as models of infectious diseases and cancer. We also encourage manuscripts on the use of human inducible pluripotent stem cells to recreate diseases in a dish.
