## **Message from the Guest Editors**

This Special Issue will focus on emerging fermentation technologies as well as the future of developing products that will have high value in world markets. Topics include, but are not limited to the following:

- Development of new fermentation processes:
  - Novel fermentation processes in pharmaceuticals
  - Novel fermentation processes in cosmetics
  - Novel fermentation processes in food industries
  - Novel fermentation processes in agriculture
  - Novel fermentation processes in the energy sector
- Development of new fermented products
- Development of new fermenter designs
- Modeling and simulation of fermentation processes
- Development of intensified fermentation processes

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus,

SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous*))
