### Message from the Guest Editors

Heat transfer and fluid flow are presented in various processes of our daily life. As new technologies are developed, it is necessary to minimize their energetical claims. For these applications, new advances in heat transfer must be carried out to increase the effectiveness of thermal control and decrease the impact on the environment. Hence, techniques in this field have attracted wide attention. Thermal optimization is not the only parameter. The endurance of the accessories used during the thermal process plays a key role when aggressive media are used. For these purposes, atypical materials must be used. They bring some disadvantages that must be overcome by special design.

This Special Issue on new advances in heat transfer and fluid flow aims to provide a platform to exchange novel advances in these studies. Topics include but are not limited to:

- Heating or cooling in special applications;
- Numerical and experimental studies in heat transfer and fluid flow;
- Design of heat exchangers;
- Polymeric hollow fiber heat exchangers;
- New approaches in the geometry of heat exchangers;
- Use of atypical materials for the construction of heat exchangers.

Deadline for manuscript  
submissions:  
**closed (25 January 2023)**

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Giancarlo Cravotto**

Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
