Message from the Guest Editor

In the development of health-promoting food ingredients and functional food processing, the focus of laboratory studies is primarily on edible and medicinal mushrooms, food processing and preservation technology, functional food ingredients processing, and bioproducts processing. Functional food ingredients can be obtained from various bioresources, such as plants, animals, microorganisms, and marine sources, as well as their by-products. Contributions that deal with new developments in processes and that can be given quantitative expression are encouraged.

This Special Issue of *Processes* will present a collection of research articles and reviews related to the development of advances in natural product food processes. According to the desired products, several production steps are required in order to produce a food product from raw ingredients, to change the physical and chemical appearance of the product, to ensure food safety, to ensure a consistent quality, and to improve shelf-life, etc.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
