Technology, Free University of
Bozen-Bolzano, Piazza
University, 1, 39100 Bolzano, Italy

Deadline for manuscript
submissions:

closed (1 February 2021)

Message from the Guest Editor

Food industries annually produce billions of tons of non-edible residues, which can cause pollution, management, and economic problems worldwide. Environmental damages to water, soil, and air are global concerns which require the development of different strategies for the use of agricultural and industrial residues as source of new products. It is well known that food byproducts are rich in high-value compounds of increasing scientific interest thanks to their beneficial effects on human health. The challenge for the recovery of these compounds is to find the appropriate process technologies able to achieve the maximum extraction yield without compromising the stability and functionality of the obtained compounds. This Special Issue on “Recovery of High Value Compounds from Food Byproducts Using Novel Processing Technologies” seeks high-quality works and topics focusing on emerging processing technologies for the recovery of high value compounds from various food byproducts.

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
