New Frontiers in Membrane Separation

Guest Editor:

Prof. Dr. Pei Li
College of Material Science and Engineering, Beijing University of Chemical Technology, Bejing, China

Deadline for manuscript submissions:
closed (15 March 2022)

Message from the Guest Editor

This Special Issue on "Frontiers in Membrane Separation" aims to curate novel advances in the development and application of membranes to address challenges in water treatment, energy, and gas separation. Topics include, but are not limited to, the following:

- Development of new materials for membrane use;
- Pervaporation membranes for the desalination of brackish, seawater, and brines;
- Membrane-based gas separation processes;
- Applications of FO membranes in reverse osmosis and nanofiltration;
- Anti-fouling properties of membranes for water treatment;
- Application of organic nanofiltration membranes.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus,
SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.
Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
