**Prof. Dr. André Domingues  
Quelhas**

Deadline for manuscript  
submissions:

**15 December 2024**

### Message from the Guest Editors

The special Issue on “Industrial Applications of Modeling Tools” aims to present new mathematical and numerical tools that have been implemented to solve real industrial problems at different production stages and that have been validated with actual industrial data, from process design to process monitoring and control. Some typical topics and applications include:

- Use of detailed phenomenological models for the design of actual process equipment and process flowsheets;
- Implementation of novel numerical schemes for faster design of actual process equipment and process flowsheets;
- Use of phenomenological and empirical models for process scale-up and optimization;
- Development and implementation of data-driven models for process monitoring (soft sensors), control, fault detection, and fault diagnosis;
- Online and real time implementation of phenomenological models for process identification (digital twins) and control;
- Novel numerical procedures for enhancement of numerical performance in actual industrial real-time applications;
- Use of empirical and phenomenological models for just-in-time maintenance.

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
