

Integrated Process Design and Development of Biorefinery

Guest Editors:

Prof. Dr. Leandro V. A. Gurgel

**Dr. Oscar Fernando Herrera
Adarme**

**Dr. Aline Gomes de Oliveira
Paranhos**

Prof. Dr. Liliane Catone Soares

Deadline for manuscript
submissions:

15 December 2024

Message from the Guest Editors

Nowadays, the world is facing numerous difficulties in guaranteeing sustainable life in society and, therefore, feasible strategies from technical, economic, and environmental points of view are needed to overcome these problems. In this sense, renewable feedstock as biomass combined with optimum conversion pathways and methods can play a fundamental role for circular economy approaches. In fact, two key conversion processes, thermochemical and biological, can be used to produce energy and products from biomass, approaching the biorefinery concept. Thus, the major challenges facing design systems are minimizing energy consumption and potential environmental impacts through life-cycle assessment and process integration/optimization between different conversion platforms.

This Special Issue is focused on methods and applications, combining techno-economic and life-cycle assessments for biorefining processes, which allows the optimum design and management of biorefineries. Furthermore, special attention will be given to multiproduct biorefinery applications, as well as future developments and trends.

an Open Access Journal by MDPI

Editor-in-Chief

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
