Deadline for manuscript
submissions:

closed (31 March 2021)

Message from the Guest Editors

This Special Issue collects original research papers or reviews focused on investigations on metal nanoparticles as catalysts for green applications. All applications which deals with designing chemical products and processes that generate and use less (or preferably no) hazardous substances, by applying the principles of green chemistry, are welcome for this special issue.

Topics include, but are not limited to:

- Development of homogeneous, heterogeneous, enzymatic catalysts for green applications
- Investigations on photocatalytic processes
- Innovative and sustainable syntheses of catalysts
- Hydrogenations, oxidations, isomerizations, hydrolysis reactions for biomass valorization
- New sustainable processes for the synthesis of important building blocks.

an Open Access Journal by MDPI

Editor-in-Chief

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
