### Message from the Guest Editors

This Special Issue aims to foster the interplay between theory and application in the field of Process Systems Engineering. Main areas of interest are:

- Systems engineering: new theoretical concepts and tools for modeling, analysis, design, control and operation of complex process systems
- Advanced process systems for renewable energy conversion; biotechnological production; production & separation of active pharmaceutical ingredients

The special issue is motivated by the 1st International Young Professionals Conference on Process Engineering (YCOPE), held in Magdeburg, Germany, on March 18-20, 2019, which addressed the outlined challenges.
