## Monitoring, Optimization, Control and Artificial Intelligence in Manufacturing System

Guest Editors:

**Dr. Jong-Ho Shin**

Department of Industrial  
Engineering, Chosun University,  
Gwangju, 61452, Republic of  
Korea

**Dr. Duck Young Kim**

Department of Industrial &  
Management Engineering,  
POSTECH, Pohang 37673, Korea

Deadline for manuscript  
submissions:

**closed (28 February 2021)**

### Message from the Guest Editors

The core concept of the 4<sup>th</sup> industrial revolution can be represented as cyberphysical systems (CPS) such that, in this regard, manufacturing systems are also evolving as a form of digital transformation. Many sensors and data communication networks have helped the transformation of manufacturing systems into CPS. More data is collected in this environment, and the collected data provides new opportunities to improve conventional manufacturing processes by making them more efficient and intelligent. This change in the amount of collectable data requires new methodologies for monitoring, optimizing, controlling manufacturing systems. In addition, the application of big data and AI in manufacturing systems is resulting in new breakthroughs for the future of factories. However, the revolution is still ongoing and under development, necessitating further research. Hence, this Special Issue will focus on new developments in manufacturing systems in terms of monitoring, optimization, control, and artificial intelligence.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Giancarlo Cravotto**

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**,  
**SCIE (Web of Science)**, **Ei Compendex**, **InspeC**, **AGRIS**, and **other databases**.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
