

Principles of Modular Design and Control in Complex Systems

Collection Editor:

Dr. Cong T. Trinh

Department of Chemical and
Biomolecular Engineering, The
University of Tennessee,
Knoxville, TN 37996, USA

Message from the Collection Editor

Modular design is at the core of modern engineering, which enables rapid, efficient, and reproducible construction and maintenance of complex systems across applications. Remarkably, modularity has recently been discovered as a governing principle in natural biological systems from genes to proteins to pathways to cells and microbial communities. The convergent knowledge of natural and engineered modular systems will be the key to drive modern biotechnology to address emergent challenges associated with health, food, energy, and the environment. This Special Issue calls for contributions across a broad range of disciplines that address recent experimental, computational and/or modeling advancements in modular design and control of complex systems.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
