### Message from the Guest Editors

Anaerobic digestion (AD) of biomass and organic waste has an important potential for the generation of renewable and sustainable energy. Methane, the desired product from AD, can be used for electricity, heat, and as transport fuel. Although AD has been in commercial use for many decades, most of its potential in energy generation is yet to be delivered.

This Special Issue seeks high-quality work which contributes to advancing AD and getting it closer to delivering its full potential. Topics include, but are not limited to:

- Innovative AD processes;
- Improvements in AD technology and processes;
- Pre-treatments;
- New sustainable feedstocks;
- Use of AD for organic acids and hydrogen production;
- Microbiology of AD;
- Economics and life cycle assessment of AD

Deadline for manuscript  
submissions:

**closed (31 March 2021)**

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
