

Special Issue

Enzyme Production Using Industrial and Agricultural By-Products

Message from the Guest Editors

It is well known that the global enzyme market continues to exhibit significant growth and is a pivotal component of various industries, ranging from pharmaceuticals and food processing to biofuel production and environmental remediation. One notable avenue for optimizing enzyme production is the utilization of industrial and agricultural by-products. These often-overlooked resources can be repurposed to not only lower the overall cost of enzyme production but also align with sustainable practices. By harnessing these by-products, we reduce waste, minimize environmental impacts, and enhance resource efficiency. Integrating these resources into enzyme production processes requires interdisciplinary cooperation and innovative technologies, which represents a transformative step toward establishing a circular bioeconomy. Therefore, we would like to invite you to submit original research or a review paper to this Special Issue of *Processes* entitled “Enzyme Production Using Industrial and Agricultural By-Products”.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P.
Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
