

Special Issue

Heat and Mass Transfer Phenomena in Energy Systems

Message from the Guest Editor

This Special Issue aims to serve as a leading international platform for the exchange of fundamental ideas in heat and mass transfer among researchers and engineers globally. The focus is on theoretical, computational, and experimental research, with an emphasis on contributions that enhance the understanding of transfer processes and their engineering applications. The issue aims to disseminate information of enduring interest in heat and mass transfer, publishing fundamental research applicable to thermal energy and mass transfer in all fields of mechanical engineering and related disciplines. It also includes archival research on thermophysical properties and the theory of heat and mass transfer, with the aim of advancing fundamental knowledge and fostering novel technological applications.

Guest Editor

Dr. Shumpei Funatani

Department of Mechanical Engineering, University of Yamanashi, 4-3-11 Takeda, Kofu-shi 400-8511, Yamanashi-ken, Japan

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P.
Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
