# Electrode Materials Design for High-Performance Energy Conversion and Storage Devices

### Message from the Guest Editors

This Special Issue on “Electrode Materials Design for High-Performance Energy Conversion and Storage Devices” aims to cover recent advances in electrocatalysts for hydrogen generation. Topics include, but are not limited to, methods and/or applications in the following areas:

- Water Splitting;
- Hydrogen Evolution Reaction (HER);
- Oxygen Evolution Reaction (OER);
- Oxygen Reduction Reaction (ORR);
- Carbon dioxide Reduction (CR);
- Green Energy.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
