# Synthesis, Biological Evaluation and Molecular Modeling of Enzyme Inhibitors

### Message from the Guest Editors

This Special Issue, devoted to "Synthesis, Biological Evaluation, and Molecular Modeling of Enzyme Inhibitors," invites high-quality research papers focusing on the structural investigation of enzymes in interaction with substrates/inhibitors. Topics of interest include the following:

- Design of enzyme inhibitors and prediction of their activity;
- Structure-activity relationship;
- Molecular docking and modeling;
- Screening for active substances.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
