# Special Issue

# Fracking and Permeability Enhancement in Fractured Rock Masses for Underground Mining

## Message from the Guest Editor

The scope of this Special Issue is to gather original experimental, theoretical, and numerical research articles that contribute toward a deeper understanding of fracking and permeability enhancement in fractured rock masses for underground mining. Potential topics include but are not limited to:

- Mechanical characteristics of fractured rock masses;
- Impact stress characteristics produced by physical fracking;
- Cracking mechanism of new fracking techniques;
- Theory and method of seepage extraction in low permeability rock masses;
- New and advanced apparatus and methods for fracking in rock masses;
- New and advanced numerical simulation developments of fracking in rock masses;

## **About the Journal**

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
