

Special Issue

Gas Emissions Control and Utilization

Message from the Guest Editors

Gas emissions have caused severe environmental issues to human beings. Various physical, chemical, and biological technologies have been employed in efforts toward the reduction and utilization of gas pollutants. This Special Issue is partially associated with the **17th International Conference on Environmental Science and Technology (CEST2021)**. This conference will be held in Athens from 1 to 4 September 2021. The best presentations of the session "Gas Emission Control and Utilization" will be published in this Special Issue, following the normal peer review process. We are pleased to invite you to submit your work in, but not limited to, the following areas:

- Air pollution;
- Gas emission reduction (CO₂, CO, SO₂, H₂S, NO_x);
- Gas utilization and production;
- Gas storage;
- Gas capture and utilization process modeling;
- Gas emissions-related energy and environmental issues.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P.
Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
