

Special Issue

Pharmaceutical and Biomedical Analysis

Message from the Guest Editors

With the progression of analytical techniques in sample pretreatment, separation science, and detection technology, analytical methods would be more beneficial for pharmaceutical and biomedical researchers to ensure the quality of pharmaceutical products, quantify and/or discover substances in complicated biological samples, determine biomolecules to reveal biological mechanisms behind metabolic networks. Using innovative analytical approaches with state-of-the-art analytical instruments, such as liquid chromatography (LC), gas chromatography (GC), capillary electrophoresis (CE), and mass spectrometry (MS) for novel applications can accelerate pharmaceutical and biomedical researches in the future. This Special Issue seeks novel research contributions in, but not limited to, the following areas:

- Development of innovative analytical methods for pharmaceuticals and biomolecules
- Pharmaceutical analysis for drug safety and therapeutic drug monitoring (TDM)
- Biomedical analysis for omic science and translational medicine

We welcome and look forward to your submissions.

Guest Editors

Dr. Hsiao-Wei Liao

Faculty of Pharmacy, National Yang-Ming University, Taipei 11221, Taiwan

Dr. Guan-Yuan Chen

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
