Deadline for manuscript
submissions:

closed (30 June 2024)

Message from the Guest Editor

We are thrilled to announce the Special Issue - New Reports on Quantum Mechanics: Discoveries, Promising Trends, and Technological Innovations - dedicated to recent advances in theoretical developments of Quantum Mechanics and its wide-ranging applications across all fields of physics. This initiative contributes to the global effort of disseminating valuable information within the research community. In this special issue, we seek original contributions that shed light on groundbreaking discoveries and promising trends within Quantum Mechanics. Specifically, we invite submissions exploring the following topics:

- One and two-dimensional systems
- Topological defects
- Curved spacetime
- Quantum metrology and quantum error correction
- Quantum optics and photonics
- Quantum wells, wires, dots, and rings
- Quantum thermodynamics
- Quantum information theory
- Quantum materials and quantum devices
- Quantum algorithms and quantum machine learning
- Quantum simulators and quantum annealing

We eagerly await your insightful submissions and anticipate engaging in fruitful discussions.

Message from the Editor-in-Chief

We get more and more evidence that quantum theory is the correct description of nature. It was born a century ago by explaining a few paradoxical results that could not be understood in the framework of classical physics. Today, quantum physics leads technological revolution in metrology, communication, computation, and the design of novel materials. Still it needs more solid foundations, and we need to develop a deeper understanding of how it can be used for new applications.

Quantum Reports is an online, open-access journal providing an advanced forum for clarifying foundations of quantum theory and developing its applications in all fields of physics and technology. *Quantum Reports* is inviting innovative and insightful contributions from the growing community of researchers of quantum science.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#) and [other databases](#).

Journal Rank: CiteScore - Q2 (*Physics and Astronomy (miscellaneous)*)
