Message from the Guest Editor

Dear colleagues,

The relationship between science, technology and theology is a hot topic in academic study. Many issues in natural theology, such as Deism and theistic evolution, are controversial topics in the study of science and theology. Moreover, technological advancements in the 21st century have made drastic changes to our daily life. In particular, many recent technologies, such as artificial intelligence and genetic engineering, have provided some challenges and theological implications to different religions. On the other hand, theology can also provide some guidelines or ethical considerations to the advancement of science and technology. This Special Issue will collect papers which discuss the intriguing relationship or mutual implications between science, technology and theology. The area of theology can be related to any religions.

Editors-in-Chief

Prof. Dr. Arndt Büssing
Professorship Quality of Life, Spirituality and Coping, Faculty of Health, Witten/Herdecke University, Gerhard-Kienle-Weg 4, 58313 Herdecke, Germany

Prof. Dr. Klaus Baumann
Caritaswissenschaft und Christliche Sozialarbeit, Theologische Fakultät, Albert-Ludwigs-Universität Freiburg, Platz der Universität 3, D-79098 Freiburg, Germany

Message from the Editorial Board

Fresh developments in the disciplines that consistently make significant contributions to our understanding of religious personality, authority, devotion, and community - disciplines ranging from psychology, sociology, and anthropology to history, art history, philosophy, literary criticism, and political science – fuel general, as well as scholarly, interest in the world's religions.

Religions is inviting innovative and comparative contributions. Please consider Religions as an exceptional, exciting enterprise ready to reward your trust, attention, and participation.
