Deadline for manuscript submissions:

closed (31 August 2023)

Message from the Guest Editors

Dear Colleagues,

This Special Issue hopes to capture the richness, variety and impact of the latest research in SAR, from technology advancements enabling the development of high-spatial-resolution-based applications to constellations and swarms providing high revisit times, as well as improvements in well-established techniques and new methodologies in data processing and applications.

Papers focusing on the following areas are welcome:

- SAR sensors and systems;
- SAR missions, swarms and constellations (both SAR-based only and multi-source);
- SAR techniques (interferometry, polarimetry, tomography etc.);
- SAR signal and image processing;
- SAR applications (from disaster monitoring to surveillance and security, land classification, etc.)
- Data fusion methodologies with SAR data.

Dr. Raffaella Guida
Dr. Maximilian Rodger

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
