

Remote Sensing for Forest Characterisation and Monitoring

Guest Editor:

Dr. Irfan A. Iqbal

School of Geography, Planning
and Spatial Sciences, University
of Tasmania, Hobart, Australia

Deadline for manuscript
submissions:

closed (31 October 2023)

Message from the Guest Editor

Over the years, remote sensing has played a vital role in characterising and monitoring forests at various spatial scales. From satellite imagery and aerial photography to the introduction of laser scanning, forest studies have benefited greatly from revolutionary remote sensing datasets and methods. The feasibility of utilising remote sensing datasets for the direct and indirect extraction of various forest parameters has been demonstrated, and the variety of applications continues to increase. With the increased availability of remote sensing data, novel methods continue to develop to characterise our invaluable forest resources at scales ranging from individual trees to the landscape level.

Prospective authors and early researchers are invited to contribute to this Special Issue of *Remote Sensing* by submitting original manuscripts reporting their latest research results in forest characterisation and monitoring. Reviews contributions are also welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
