

## Advances in Remote Sensing of Solving Challenges in Autonomous Driving and Safety Analysis

Guest Editors:

**Dr. Mohammad Aldibaja**

Sensing and Perception, SMART  
Mechatronics Research Group,  
Saxion University of Applied  
Sciences, Enschede, The  
Netherlands

**Dr. Sufyan Ali Memon**

Department of Defense System  
Engineering, Sejong University,  
Seoul 05006, Republic of Korea

**Dr. Andrea Masiero**

Secretary of ISPRS WG I/7—  
Mobile Mapping Technology,  
Interdepartmental Research  
Center of Geomatics (CIRGEO),  
University of Padua, Padua, Italy

Deadline for manuscript  
submissions:

**15 July 2024**

### Message from the Guest Editors

As safety is the prime priority and the key issue in commercializing autonomous vehicles, the main challenge in the research field has become to increase safety, and more in general the system performance, in critical and unique working conditions.

Remote sensing and image processing applications play the main role in designing optimal solutions based on sensory and observation data such as modeling the changes in the pattern distribution of LIDAR 3D point clouds in snowfall weather conditions and improving the localization accuracy by matching map observation environmental features. Therefore, this Special Issue aims to add value to the autonomous vehicle research field by demonstrating and analyzing critical and unique problems of mapping, localization, perception and path-planning modules.

### Keywords:

- autonomous vehicles
- 3D point cloud analysis
- path planning with unprotected turns
- robust perception of construction areas
- SLAM-based mapping in challenging environments
- road pavement assessment for driving safety analysis
- object status classification in urban traffic conditions
- .....

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
