of Science and Technology,
University of Trás-os-Montes e
Alto Douro, 5000-801 Vila Real,
Portugal

Message from the Guest Editors

The third edition of this Special Issue aims to showcase the latest research, methodologies, algorithms, best practices and novel applications in remote sensing. The focus is on pushing the envelope in data analysis, visualization and practical application. Contributions are invited to advance the field through innovations in deep learning for remote sensing, decision support and management systems tailored to agroforestry, precise forecasting models for the yield and disease prediction, innovative precision agriculture and forestry approaches, and pioneering techniques for automatic yield and disease mapping and data visualization.

Deadline for manuscript
submissions:

15 September 2024

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
