Institute of Catalonia (ICGC),
Barcelona, Spain

Prof. Jordi Vitrià

University of Barcelona,
Barcelona, Spain

Message from the Guest Editors

Dear Colleagues,

In this Special Issue we intend to compile a series of papers that merge the use of SAR images with AI techniques for environmental monitoring. SAR data should be the main focus of the study, but other data sources can also be used in the papers presented. Contributions that present new methodologies in the spatial and/or temporal analysis of SAR images are welcome.

Deadline for manuscript
submissions:

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
