

Sentinel Analysis Ready Data (Sentinel ARD)

Guest Editors:

Dr. Gregory Giuliani

Mr. Daniel Wicks

Dr. Ioannis Manakos

Dr. Olivier Hagolle

Dr. Jose Gomez-Dans

Dr. Cristian Rossi

Deadline for manuscript
submissions:

closed (30 June 2022)

Message from the Guest Editors

This Special Issue is consequently aiming to cover the most recent advances in ARD developments and implementations for Sentinel data, to support community consensus on Sentinel ARD. We therefore welcome contributions with respect to (but without being restricted to):

- Methods for generating Analysis Ready Data for both optical (Sentinel-2 and 3) and SAR imagery (Sentinel-1);
- Defining ARD level for thermal imagery (Sentinel-3);
- Defining guidelines for ARD product interoperability;
- Defining ARD level for Sentinel-5P (Air pollution);
- Significance of ARD for Data Producers; Data Distributors; Data Users;
- Data quality, reliability, flagging, etc.;
- Cost/Benefits analysis for ARD data;
- Thematic application of Sentinel ARD;
- Software tools that support generating analysis-ready data for both optical and SAR imagery;
- Support to policy framework such as the Sustainable Development Goals, the Paris Agreement, or Aichi targets;
- Links with initiatives like Copernicus or the Global Earth Observation System of Systems (GEOSS);
- Data cube interoperability;
- Error propagation and uncertainty handling;
- ARD standards;

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
