Remote Sensing in Earth Surface Changes and Deformations Caused by Earthquake and Landslide

Guest Editors:

Prof. Dr. Yi Wang
Institute of Geophysics & Geomatics, China University of Geosciences, Wuhan 430074, China

Prof. Dr. Jun Hu
School of Geosciences and Info-Physics, Central South University, Changsha 410083, China

Dr. Weile Li
State Key Laboratory of Geohazard Prevention and Geoenvironment Protection, Chengdu University of Technology, Chengdu 610059, China

Deadline for manuscript submissions:
closed (31 December 2022)

Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to collect the most recent research on remote sensing applications in earth sciences. In particular, this Special Issue is dedicated to satellite, aerial and terrestrial contactless devices for observation and evaluation of earth surface changes and deformations caused by earthquake and landslide, and new processing techniques related to remote sensing. We invite you to submit scientific, technological, or review articles about recent research within one or more of these topics:

- Detection of earth surface changes—multitemporal remote sensing;
- Mapping, modeling, and/or monitoring approaches in earth surface changes and deformations;
- Evaluating the earth surface status and creating novel solutions by integrating remote sensing and GIS techniques;
- Remote sensing of earthquake and landslide deformation monitoring.

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.
Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
