### Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to disseminate and share findings on national or regional ecosystem service assessment and its environmental stresses using remote sensing data, and the coupling of ecosystem services with human wellbeing. Original research articles or review manuscripts are invited in the following related areas:

- Ecosystem services and tradeoff/synergy by remote sensing;
- Driving mechanism of ecosystem services and the determinants from big scientific data;
- Ecosystem services provision and demand based on remote sensing application;
- Land use optimization through ecosystem service enhancing.

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
