Italy

Deadline for manuscript
submissions:

closed (31 December 2020)

Message from the Guest Editor

The added value of remote sensing inspection is now becoming strictly mandatory because of the need of governments to tackle the increasing anthropic pressure that is threatening several environmental ecosystems. In this framework, governments are requiring innovative tools aimed at aiding decision makers in deploying effective political ecology and environmental policy actions that advocate sustainability. Indeed, by taking into account the insights offered by satellite EO, decision-makers on environmental policies can adopt tailored strategies to deal with these new challenges, including those related to climate change.

This Special Issue seeks to collect manuscripts focused on remote sensing applications supporting environmental governance in several thematic areas including, among others, air, biodiversity, oceans and coasts, land and soil management, water consumption, and food production optimization.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
