submissions:

closed (15 April 2023)

Message from the Guest Editors

Dear Colleagues,

Ocean is the major reservoir of water, heat, and greenhouse gases on Earth. Remote sensing has been a key technology in ocean observation. Ocean remote sensing uses modern instruments including satellite, radar, as well as altimetry to study important ocean phenomena and processes.

We invite you to submit reviews or research articles to this Special Issue in order to improve the current knowledge on ocean remote sensing. Papers addressing ocean information retrieval methods, remote sensing data validation, calibration, and applications based on remote sensing data are welcome.

The applications or technologies in your work should be novel and should bring new information to this area.

Dr. Weimin Huang

Prof. Dr. Deepak R. Mishra

Dr. Ana Brito

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
